MyConnect 50

MyConnect 50

All in one system

Simply the best

The MyConnect 50 is a "All in one" audiophile who integrates an amplifier of 2x60W, a network player wifi and ethernet, a FM tuner, a CD player, a USB player and a Bluetooth receiver.

In order to offer to the music lovers a musical restitution optimum, our engineers have chosen to integrate an amplifier in class AB, synthesizing thus the best of class A and class B reunite. This singular choice for an integrated product guarantees a very high quality of sound reproduction.

The amplifier is the heart of your high-fidelity system, it is he who has the heavy task of "driving" your speakers, to extract their quintessence. It must bring neutrality, detail, dynamics and clarity of message.

The MyConnect 50 integrates a network player. You can play your own music (PC / MAC, NAS), benefit from services of diffusion in continuous such as Spotify, Deezer, Tidal, Qobuz, Tune-In, etc. Listen to services of streaming, radio Internet via Tuneln, radio iHeart and others, Airplay and your music from your smartphone or your tablet and other supports.

The MyConnect 50 has an open interface with a capacity for evolution for future services and evolutions.

This network player is multi-room, you can play different music in different rooms. The whole family can benefit from its own music for example listen to the radio in one room and your own music in another.

The possibilities are infinite.

Applications Android et iOS available.

*Smartphone non inclus

Simply the best

The MyConnect 50 is an audiophile «All in one» with a built-in 2x60W amplifier, a wifi and ethernet network player, a FM tuner, a CD player, an USB reader and a Bluetooth receiver.

In order to offer music lovers an optimum musical reproduction, our engineers have chosen to integrate an amplifier in class AB, thus synthesizing the best of class A and class B together. The amplifier is the heart of your high-fidelity system, it is the one that has the heavy task to drive your speakers, to extract their quintessence. It must bring neutrality, detail, dynamics and clarity of the sound message. The choice of class AB proved to be an obvious choice.

The MyConnect 50 incorporates a network audio player. You can play your own music from your PC / MAC, NAS but also from your smartphone or tablet and other media. The MyConnect 50 is fully compatible with Airplay and DLNA.

You also can enjoy streaming services such as Spotify, Deezer, Tidal, Qobuz, Tune-In , Internet radios via TuneIn, iHeart radio and much more.

The MyConnect 50 has an open interface with scalable capacity for future services and evolutions.

This MyConnect 30 has an open interface with scalable capacity for future services and evolutions. This network player is multi-room, you can play different music in different rooms. The whole family can enjoy their own music for example listen to the radio in one room and your own music in another. The possibilities are limitless.

Android and iOS apps available

* Smartphone not included

Connectivité et technologie

Une connectivité complète équipe le MyConnect 50. Trois entrées analogiques stéréo dont une commutable en entrée phono MM pour les amoureux des vinyles, deux entrées SPDIF optique et une entrée SPDIF coaxial, une entrée Bluetooth et USB-A, une sortie PRE-OUT fixe ou variable, paramétrable dans le menu ainsi qu'une sortie SUB pour la connexion d'un caisson de grave actif.

La sortie des haut-parleurs est assurée par quatre borniers à vis permettant un branchement direct des fils d'enceintes ou bien l'utilisation de prises bananes.

Votre MyConnect 50 est évolutif grâce au port USB Upgrade situé sur la face arrière. Côté réseau, il dispose d'un port Ethernet pour une liaison filaire (LAN) ou sans fil WiFi (Wlan).

Les technologies employées, tant dans le traitement analogique que numérique du signal audio ont un but unique, celui de reproduire la musique le plus fidèlement possible. Le parcours du signal audio est le plus direct possible afin d'éviter toute altération. Concernant le signal numérique, le convertisseur Wolfson WM8740 a été choisi pour ses excellentes performances. L'alimentation surdimensionnée s'appuie sur un transformateur toroïdal puissant permettant d'alimenter l'amplificateur de puissance de classe AB avec confort.

Connectivity and technology

The MyConnect 50 offers a full connectivity: three stereo analog inputs including a switchable MM phono input for vinyl lovers, two optical SPDIF inputs and a coaxial SPDIF input, a Bluetooth and USB-A input, a fixed PRE-OUT output or variable, and a SUB output for connecting an active subwoofer.

The speaker output is provided by four screw terminals allowing a direct connection of the speaker wires or the use of banana sockets.

Your MyConnect 50 is updatable ! Thanks to the USB Upgrade port on the rear panel. On the network side, it provides an Ethernet port for a wired connection (LAN) or wireless WiFi (WLAN).

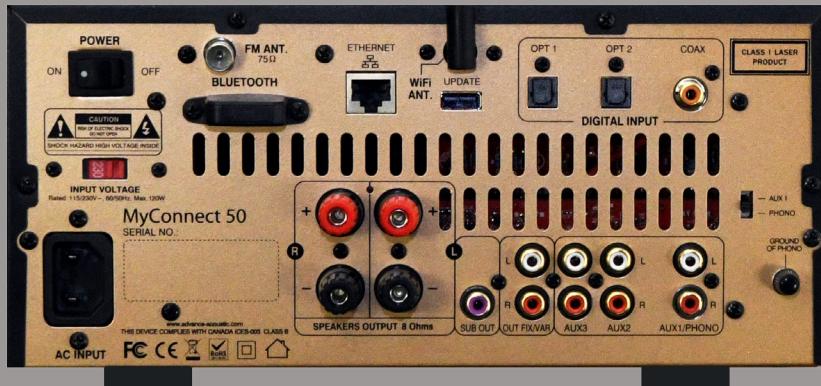

The technologies employed in both analog and digital processing of the audio signal have a unique goal, that is to reproduce the music as faithfully as possible. The audio signal path is as direct as possible to avoid any alteration. Regarding the digital signal, the Wolfson WM8740 converter was chosen for its excellent

The oversized power supply is based on a powerful toroidal transformer to

Specifications

POWER OUTPUT	48/70 Watts CLASS AB 4Ω/8Ω
OUTPUT LEVEL	Unbalanced 2 volts
FREQUENCY RESPONSE	(+/-3dB) 20Hz - 45 kHz
DISTORTION	< 0.1%
OUTPUT IMPEDANCE	10KΩ
CHANNEL SEPARATION	> 110dB
S/N RATIO	> 92dB
DAC	DIGITAL AUDIO WOLFSON
AC INPUT	WM8740
POWER CONSUMPTION MAX	115 or 230V
DIMENSIONS	Max 30W
NET WEIGHT	H. 136 x I. 265 x D. 385
	5,5 kg
